Packaging

Catalynt is one of North America's largest certified woman-owned providers of custom packaging, manufacturing, and laboratory services.

Our contract packaging solutions are built for reliability and compliance—tailored container sizes, safe materials, private labeling, and integrated blending and packaging all under one roof. We streamline your supply chain, protect your chemistry, and deliver every package with the quality and discretion your business deserves.

SPECIALIZED PACKAGING MATERIALS

We select the right materials to protect your chemistry—factoring in compatibility, moisture sensitivity, temperature stability, and hazard considerations—so your product stays safe and effective from our site to yours.

CUSTOMIZED PACKAGING SOLUTIONS

From pails to totes, closures to moisture-control features, we tailor packaging formats to meet your exact requirements and simplify your supply chain.

PRIVATE LABELING & CUSTOM CLOSURES

Strengthen your brand presence with private label solutions—your logo, your identity—delivered on packaging designed and filled by Catalynt.

Dedicated and specialty equipment for various industry and customer-specific needs.

COMPLIANCE & SAFETY

Every package is built to meet stringent regulations for chemical handling and transport. Safety and compliance aren't optional—they're standard. ISO-9001 certified facility, NF/NSF capabilities, cGMP compliant.

EFFICIENCY & COST-EFFECTIVENESS

Repackaging services can reduce freight costs, improve handling, and optimize storage—delivering both protection and bottom-line value. With low to no MOQs Catalynt is your partner to improve your bottom line.

BLENDING + PACKAGING, TOGETHER

Catalynt integrates blending and packaging under one roof, streamlining your project timelines and eliminating the need for multiple vendors.
